10. **Description and Aim of the Course**

This module introduces students to know how business operates and helps them to get real insights about the various functional areas in a business and the professionals who build careers in each function. They will also learn about how business can tackle many of our societies more pressing human and social responsibility obligations.

Aim(s)/ Objective(s)

The course aims to introduce the students to the world of business. The module develops a student's conceptual and practical knowledge of starting and managing a small business. It equips them with the knowledge of resources needed to sustain the business. This module is a perfect setting for career preparation as students are exposed

to different aspects and areas of business to which they can match individual abilities and interests.

Upon completion of the module, students should be able to:
1) Understand how different departments of a business operates towards a shared goal and objective

2) Learn how a profit-making business works with social responsibility

3) Understand the importance of operational efficiency and need for customer service

4) Gain knowledge on how to market and promote goods and services.

11. Learning Outcomes

Upon successful completion of this module, the students will be able to apply the knowledge of accounting principles to practical problems and will be able to:

- Demonstrate an in-depth understanding of the forces that shape the business and economies of the world
- Explain why ethics and social responsibility is an integral part of any and every business organisation
- Demonstrate an understanding of the major functions of business including Business Management, Operations Management, Quality Management and Financial Management, Human Resource Management
